

TOMAS OSLIAK

Web Developer
UI/UX Designer

ABOUT ME

Hello, my name is Tomáš Olšiak and I am 26 years old. I am currently working as a freelancer. Since 2023, I decided to change my priorities and started learning to program, while web development appealed to me the most. I started learning from the basics of HTML, CSS, JS until I progressed to React and Next.js, which I really like and would like to stay with. I am looking for a stable job where I will work with the given technologies that I enjoy and I will improve in them.
